Quadtec
H&W Quadflieg

Quadtec - Machining Technology

Precision others can only dream of!

Facts

- Exhaustive advise for a cost-efficient realization of your ideas
- More than 60 years of experience
- traditional, family-owned company
- Based in Germany´s high-tech location Aachen
- Manufacturing of hightest precision ready-to-install machine parts
- CNC turning and CNC milling technology, 3D measurement technology
- Processing of materials from stainless steel over plastic, non-ferrous metals, titanium to harden materials.

H & W Quadflieg´s Offer

- Small and medium size series production from 5 to 5,000 pieces
- Dimensions from 3 mm up to 700 mm for parts weighing up to 250 kg
- Measurement of high complex and complicated position tolerances ahd free-formed surfaces
- Complete manufacturing from a single source
- ÜV Rheinland/ Germany approved for the re-stamping of certified raw materials
- ISO-certified 9001: 2015

Technologies and Services

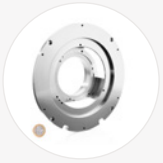
Markets and Applications

We manufacture orders from 5 to 5,000 parts on state-of-the-art 5-axis machining centers in the following market segments:

Mechanical engineering

Robotics



Aerospace

Mechanical engineering

Drive technology

Chemical industry

Optical applications

Machine Park

In our cutting-edge machine park with 16 different turning and milling centers, we manufacture the highest precision up to 0.01 mm. H & W Quadflieg fulfills your most demanding orders up to 5-axis simultaneous manufacturing.
